How To Setup MAS For Development Environment
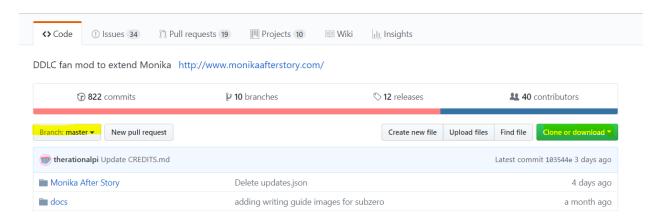

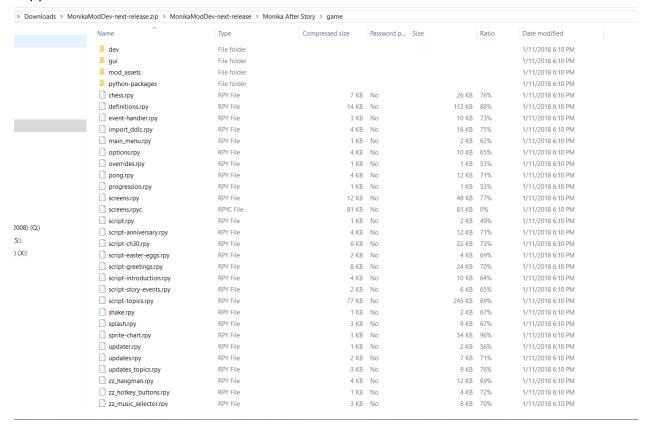

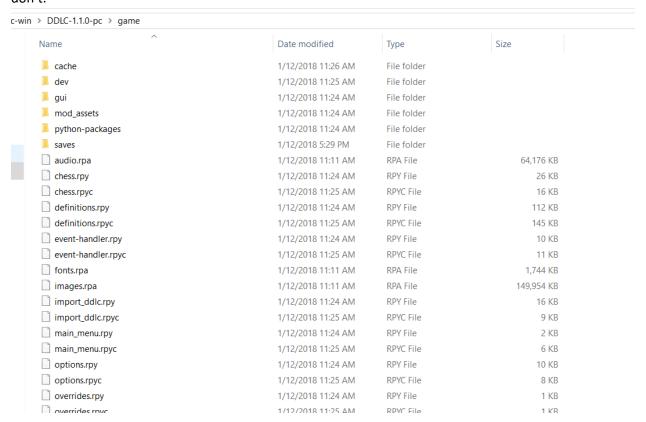

1. Download Doki Doki Literature Club from http://ddlc.moe/.
2. Choose the **branch** that you want to download (highlighted on the left) and then click the green **Clone or download** and select **Download Zip**.

3. Once you've downloaded and uncompressed both programs. Navigate to the games folder. Copy the contents in this folder.

4. Navigate to the DDLC Game folder and paste the contents into this folder. You may be prompted to overwrite some files that already exist. It doesn't really matter whether you do or don't.

Name	Date modified	Type	Size

5. Edit the script(s) you want to edit using Renpy, Visual Studio or a text editor.

```
4923        if renpy.seen_label('monika_tea'):
4924            m 2c "Have you been drinking coffee lately, [player]?"
4925            m 2m "I hope it's not just to make me jealous, ehehe~"
4926        m 3b "Coffee is such a nice thing to have when you need a little pep of energy."
4927        m 4j "Whether it's hot or cold, coffee is always nice."
4928        m 4a "Iced coffee, however, tends to be sweeter and more pleasant to drink in warmer weathers."
4929        m 2e "It's funny how a drink for giving you energy became a treat for you to enjoy."
4930        m 1k "Maybe if I find out how, I'll tinker with the script so I can finally drink some! Ahaha~"
4931        return
4932
4933 init 5 python:
4934        for key in ['sick','ill']:
4935            monika_topics.setdefault(key,[])
4936            monika_topics[key].append('monika_sick')
4937
4938 label monika_sick:
4939        m 1g "Aw, I'm sorry to hear that, [player]."
4940        m 1r "I hate to see you suffering like this."
4941        m 3e "I know you love spending time with me, but maybe you should go get some rest."
4942        m 1k "Don't worry, I'll be here waiting for you when you get back."
4943        m   "Get well soon!"
4944        return 'quit'
4945
4946 #################
4947 #Incomplete ideas#
4948 #################
4949 #Favorite food
```

6. Open up the game to test if the changes you made work like you expected.
